SUMMARY

Product Designer with 3+ years designing enterprise SaaS products in fintech (private capital valuation, portfolio monitoring, and data extraction). Owns end-to-end design across discovery, wireframing, high-fidelity UI, and developer handoff, and has built a 50+ component design system reused across an entire product suite. Reduced post-release design defects by 70-80% through structured Design QA and UAT documentation. Uses AI-assisted workflows (Claude AI) to speed up exploration and design decision-making.

EXPERIENCE

Product Designer · 73 Strings

May 2023 – Present

Bengaluru, India – Enterprise SaaS, private capital data extraction, monitoring & valuation

- Owned end-to-end design of 73 Value Credit, replacing inconsistent navigation and layout patterns with a unified, structured experience for private credit valuation workflows.
- Built and scaled a design system of 50+ reusable components for 73 Value Credit that was adopted across 73 Monitor and 73 Extract, improving UI consistency and speeding up delivery across the product suite.
- Led usability redesigns on 73 Monitor and the data-heavy 73 Extract user flow, cutting unnecessary friction and earning strong positive feedback from client organizations.
- Redesigned core flows and navigation across the 73 Strings product suite to support onboarding of new enterprise clients during a period of company growth.
- Ran Design QA against every developed build during UAT and authored 10+ detailed bug-tracking QC reports, reducing post-release design defects by 70-80%.
- Translated fintech requirements from product managers and stakeholders into user flows, wireframes, and high-fidelity Figma prototypes, partnering closely with developers through implementation.
- Used Claude AI to accelerate design exploration, ideation, and documentation.

KEY PRODUCTS

- 73 Value Credit** – Private credit valuation platform; owned 0-to-1 design and the core design system.
- 73 Monitor** – Portfolio monitoring dashboard; designed the dashboard experience and led usability testing to reduce friction in data-heavy views.
- 73 Extract** – Data extraction workflow; simplified a complex multi-step flow with clearer data visualization, improving task efficiency.

SKILLS

Core Design: Product Design, UX Design, UI Design, User Research, Usability Testing, UX Strategy, User Flows, Journey Mapping, Personas, Wireframing, Prototyping, Information Architecture, Design Systems, Component Libraries, Visual Hierarchy, Responsive Design, Accessibility (WCAG), Dashboard Design, Data Visualization, Enterprise UX, Design Thinking

Tools: Figma, FigJam, Miro, HTML/CSS, Jira, Confluence, AI-Assisted Design Workflows (Claude AI)

Collaboration: Stakeholder Management, Cross-Functional Collaboration, Developer Handoff, Design QA, UAT, Requirements Analysis, Design Documentation

EDUCATION

Professional Bootcamp in UI/UX Design

Nov 2022 – Apr 2023

DesignBoat UI/UX School, Bangalore

Bachelor of Commerce, Corporate Secretaryship

2019 – 2022

PSG College of Arts & Science, Coimbatore

CERTIFICATIONS

- UI/UX Design Program – DesignBoat
- Introduction to Front-End Development – Meta (In Progress)
